

VIA DUCT

- width adjustable workstation -

VIADUCT

Viaduct's distinctly modern, high-contrast look honours the geometric and architectural inspiration behind the design. The splice between metal and timber highlights the system's bold symmetry adding another dimension to your office layout.

It's clean lines and distinct shapes allow it to stand alone as an eye-catching feature piece or grouped together to create interesting share spaces, optimizing your office.

Single Table-height with black powdercoat and timber frame

WORKTOP

The Viaduct system offers a variety of work top sizes and materials with a range of laminates and timber finishes. Our laminates are hard wearing, UV resistant and easy to clean. The edging is a heat bonded and scratch resistant work surface, available in many colours. The substrate of our worktops is manufactured from renewable plantation timber.

ACCESSORIES

To compliment Viaduct our range of storage, screens, desk accessories, monitor arms, shelving and meeting tables are available to complete your look

PERSONAL STORAGE

Personal storage units are available in many shapes and sizes from mobiles, caddies and open shelf units. Choose between a key lock or combination lock system. All personal storage units are available in matching or contrasting colours.

FRAME

A mixture of tubular steel & timber, this frame is designed to interconnect with the next for multiple workstation layouts. It comes with a built in cable tray to house power and data or can be reversed and used as an additional strengthening brace.

The cable tray is extendable in length between 1400-2100L. Available in a standard Black textured powdercoat finished, or alternative Dulux colours are available.

LEG VARIETIES

A solid timber leg comes with an adjustable glide for levelling. Various leg options to choose from: Scandinavian, stained, painted, or as a pressed ply.

Height

Viaduct comes in two standard heights to suit a desk or standing bench. This option is perfect for the moving office, catering for hot-desking, break-out spaces, meeting rooms or anywhere where flexible work areas are required.

Width

The system's width adjustability means that you get more use out of your workstation. If extra length is required simply set width of the legs and change the top to the required length. A great way to reuse existing furniture
